Very nice and functional for homeschooling pre-algebra. Found the solutions manual free at my local library and just needed to match it up with the correct edition hard cover, which will be reused for several children, unlike workbooks. Basically, I spent about \$12, shipping included, for a \$71 math curriculum to reuse over and over again! Clear solutions in solutions manual, showing how to reach each correct answer. Our family is very satisfied with this book. It begins with a review of basic mathematics, and continues introducing algebraic concepts throughout, while reviewing past questions and concepts along the way. Very good math book! I HIGHLY recommend it .

I like the built in review in each lesson, and how each numeral before each problem has the lesson number in parenthesis underneath it, so it's easy to reteach anything the student doesn't remember.

This feature was introduced in the third edition, so make sure you get that one. Someone told me it was in newer editions, but I haven't seen it myself, so I'd check that out. The explanations are easy to understand as well as concise, keeping reading to a minimum, a great plus with my boy. There are examples as well, that show exactly how to do each problem.

Cannot beat Saxon for the step-by-step system. Each concept is covered again and again and again in the homework. There's no way to not understand a concept after 70 lessons where it is given as a problem.

I adore Saxon Math for my homeschoolers.

Saxon is a great math curriculum. We have been using it for the last few years for homeschooling. In this particular book Algebra 1/2 there is geometry intermixed within the entire book. So they are learning algebra along with geometry.

Exactly what I wanted. Good buying experience. On time delivery. No issues. Very much satisfied.

Love Saxon math. Works great to teach my home-schooled kids. My kids were struggling in public school in math and the constant review of all the concept did the trick.

Just what we were looking for. Subtract 2lbs from my daughter's 100lb school backpack.
