Customer Reviews

My lovable and sweet grand-daughter almost died from a blood clot and stroke as a direct result of her 5in1 Pentacel DTaP shot. She is now developmentally delayed and has brain damage. She is doing well (and getting better every day) mostly because we never vaccinated her again. The antibiotics in the vaccine destroyed her gut flora and destroyed her Vitamin K production which led to a severe blood clotting condition. She bled in her brain and had a stroke. This took 7 days to develop (we believe the manufacturer knows that this can happen because they do mention the 7th day in their vaccine package insert). Professor Coulter focuses on DTaP which is probably the most toxic vaccine but coupled with 4 other vaccines it is extremely toxic. How any child survives this is a mystery to me. This book is a "history" book of DTaP and clearly shows that parents rely on doctors too much for advice when the answer is right in front of them. It is really very simple (even though doctors continuously disagree probably to appease their conscience). You have a healthy child until the vaccinations. How can you not put two and two together? Professor Coulter clearly shows that this vaccine is dangerous. All vaccines are dangerous and don't be fooled, they are! If you don't know what mercury and aluminum is, research it, both of these metals are super toxic and have no business being injected into a baby's body. As a Christian, I also find it very disturbing that aborted fetal cells are used in the manufacture of vaccines. Professor Coulter gives us knowledge that is

well researched and gives us a complete picture. Vaccines do not protect our babies and endanger their lives. YOU ARE YOUR CHILD'S PROTECTOR. READ THIS BOOK BEFORE YOU HAVE YOUR BABY AND PROTECT YOUR CHILD FROM BIG PHARMA'S GREED.

This was a good book, but it was hard for me to get through the pages...so many sad stories. My son developed symptoms of autism at 16 months, but was healthy before then. We have no history of autism on either side of our families. I only recall getting 6 vaccines when I was little and I believe it should have stayed the same. My son has had over 30 shots and he is only 4. I believe in the 6 vaccines, but not over 30. It is ridiculous! They are poisoning our children!

Amazing but true. Read this before you have kids and share it with those who do have kids so that they can make informed choices.

great book, but upsetting that this is happening.

Very good book...very clear on the dangers of vaccines. ANYone reading this who walks away thinking it's not a big deal...or that the so-called immunity purported to be given outweighs the risks of damage from shots has their head in the sand or is being supported by one of the drug companies/subsidiaries. It was actually too much to read of the same kind of story after a number of chapters. They simply repeat with different names and yet another expression of the damage symptoms, plus the stupidity of the medical field in their blindness or fear to stand up and stop ignoring the obvious. Good book for anyone on the fence; a graphic review for the rest of us. I would buy this for your friends/family who may need the information presented right in their faces, or to see how their own vaccine damaged children were not an anomaly, so they can take back their power to be the parent. People need to stop assuming that everyone with a medical degree really knows what they are doing to your child when they administer unnecessary, toxic and unproven vaccines - or cares beyond the politics/money involved. It's the same travesty going on in the pet ownership and veterinary world.

Every body should read it

This book is frightening, riveting, heartbreaking and horrifying. It tells of knowledge the medical community should be passing onto parents of newborns faced with vaccinations of all types,

particularly the DPT vaccine, which is responsible for permanent neurological damage from moderate to severe, even death that can be attributed with documentation to the "P" portion of the vaccine. Because of the pharmaceutical companies grasp on an ever-replenishing financial base of newborns to be vaccinated, more and more vaccines, some (DPT) not fully tested. This book is the information we all require to make an informed choice about vaccination, even in the face of government mandates!

My son started having seizures after his 6 month shots. I was never a mother who even questioned the safety of vaccinations until they affected my child. I 100% believe the shots caused his seizures and we have decided to stop shots. All of my son's test have come back normal, no explanation why he is having seizures. Please read this book before you vaccinate. First seizure happened March 27, 2014.
