Scholastic Q & A: Why Do Volcanoes Blow Their Tops? (Scholastic Question & Answer)

Synopsis

From simple questions like "Where are volcanoes found?" to more complex ones like "What makes a volcano erupt?," this book delivers the answers kids want. Whether children hear about volcanoes and earthquakes on television, learn about them at school, or live in vulnerable areas, they are amazed by and afraid of volcanoes and earthquakes. Kids want to know more about them, both to satisfy their curiosity and to ease their fears. This book explains everything about these natural disasters, from what happens just before a quake or eruption to how natural disasters help renew nature's landscape.

Book Information

Paperback: 48 pages

Publisher: Scholastic Reference; Act edition (November 1, 2000)

Language: English

ISBN-10: 0439148782

ISBN-13: 978-0439148788

Product Dimensions: 7.9 x 10 x 0.1 inches

Shipping Weight: 10.6 ounces

Age Range: 4 - 8 years

Grade Level: Preschool - 3

Customer Reviews

Reviews of the first six titles in the Scholastic Question and Answer Series, published in September 1999: Booklist, November 1, 1999: "Each book in the Scholastic Question and Answer series focuses on a particular area of science, asking questions related to the topic and answering each query with one or more paragraphs of pertinent information. Although the idea has been tried before, this series works better than most in that it organizes the material well, it asks questions that children may actually have posed, and the answers are clear and precise. Stars introduces topics in astronomy, from "Do asteroids ever strike earth?" to "Is there life elsewhere in the solar system?" The Bergers are being responsible as they qualify some replies with phrases such as "Most

scientists think." Often dramatic and beautiful, the paintings illustrate the text quite effectively. Flies explores the world of insects, answering questions such as "Do insects have tongues?" and "How can you tell a moth from a butterfly?" The colorful illustrations are detailed, vivid, and well conceived. A science series attractive enough for browsers, yet solid enough to help support the curriculum."–Carolyn PhelanSchool Library Journal, December 1999."These series entries will answer many of the questions children have about the subjects covered. . . The student-friendly questions-and-answer format is appealing, with simple and concise one or two paragraph answers and attractive, colorful illustrations. Basic up-to-date information presented in a chatty, readable style."–Eunice WeechThe Grands Rapids Press, August 22, 1999:"…a promising new series for kids."–Sue StauffacherThe Atlanta Constitution, September 27, 1999:"Anyone who checks out this series can learn a lot and impress their friends and family."–Julie Bookman, for News for Kids

Melvin and Gilda Berger are the authors of more than two hundred books for children. Their books have recieved awards from the National Science Teachers Association, the Library of Congress, and the New York Public Library.
