## Synopsis

Cannabis Extracts: The Marijuana Handbook2 Manuscripts - Marijuana: Growing Cannabis, DIY Cannabis ExtractsMarijuanaGrowing CannabisThis book will teach you everything you need to know about growing cannabis. In this book, you will learn how to select the best seeds, how to grow cannabis indoors as well as outdoors, how to take care of your cannabis plants as well as when and how to harvest your cannabis.Â Very few plants can be used for both recreation and medicinal purposes such as treating insomnia, anxiety, and stress among other things. You may probably know all the benefits that this plant can offer; however, you may not have a reliable supplier with the kind of cannabis you want. What then do you do? Your best option would be to grow cannabis. But you can only have the best marijuana with the right information on growing this plant and this is where this book comes in. YouÃ¢ ¬â„¢re about to discover how to grow and harvest cannabis plants. Inside This Book You'll Find: What Makes Cannabis Great For Medicinal And Recreation PurposesGetting Started: Seed SelectionIndoor Versus Outdoor CultivationSetting Up For Indoor CultivationSetting Up For Outdoor CultivationThe Growing ProcessHarvestingMuch, much more!Cannabis ExtractsMany of the extracts that we are going to discuss in this section are going to be listed later on in the book with the process in which you are going to be able to follow to make that particular extract.Â Kief:Â A powdery dust that can be smoked on its own but is going to burn quickly.Â Hash:Â Substantial chunks of extract. One of the oldest methods known for making extracts.Â Bubble hash:Â The same as the regular hash. The process for making bubble hash is one of the safest out there.Â BHO (Butane Hash oil):Â This oil will be somewhere between a waxy oil all the way up to a hard shatter. You should always test your BHO before you smoke it to make sure there is no butane left over on the extract.Â CO2 Oil:Â Your result for CO2 oil will be either a liquid you use for a vape pen or wax. This is one of the more costly techniques for making extracts.Â Rosin:Â You will either get a clean oil or a shatter like substance with the rosin extraction process. Due to the fact that it gives a decent product, rosin is one of the more popular methods to use when making extracts. Rick Simpson Oil (RSO):Â A stick tar is going to be left over from the process once you have finished it. RSO contains a higher level of cannabinoids and is found to be effective as a topical ointment. ## **Customer Reviews**

Writer James Henderson is a really great book writer . I bought this book because I thought the methodology for extracting cannabis oils could be applied to other herbs. This may be true but it looked way too complicated and expensive considering the small amounts I would need it for. Interesting though. Shows why essential oils cost so much.

A very useful book on making your own extracts and so much more. Get this book, and you will have a wealth of information in your hands!

Good Read

Five stars? Is that all I can give? Really, this book deserves so much more. The techniques provided on these pages, as well as the suggestion it gathered, are worth far more than five stars and I would consider this book to be a great bargain at twice the price. Keep up the excellent work, James Henderson. Highly recommended.

Well written and easy to understand. I found some good information on a couple subjects that I haven't read before. The book also teach you how to grow cannabis the right way. If you are interested about the usage of this miracle herb, grab the book and learn. PS. Make sure that you live in a state where this herbal plant is legal or else you will put yourself at risk.

This was a great book. This book was very informative and helpful. I love this book. I highly recommended to all. I found some good information on a couple subjects that I haven't read before.
