The The Magic School Bus: Inside The Earth

Synopsis

NARRATOR: Polly Adams, Cassandra Morris & a cast of kids
FORMAT: 1 CD, Unabridged
Rock collecting has never been quite like this! When the class forgets to do its homework, a fieldtrip through the Earth's crust, into the center of the Earth, and out through a volcano will teach them not to forget their assignments again - and then some!

Grade Level: 2 - 5

Customer Reviews

Solid science-cum-wackiness is the hallmark of this nonfiction series. Ages Copyright 1989 Reed Business Information, Inc. --This text refers to an out of print or unavailable edition of this title.

Grade 2-5 Cole and Degen have struck at the core once again to produce an exciting, attractive, and informative science book for young readers. Children who entered Ms. Frizzle's classroom in *The Magic School Bus at the Waterworks* (Scholastic, 1986), are in for another exuberant, intriguing field trip. This time, it's to the center of the earth. Surprises abound through each strata down to the very inner core where it is hot, hot, hot. The class collects rock samples before the bus is expelled from the earth's core in a volcanic eruption. Illustrations are in watercolor cartoon format and attendant "balloons" contain pertinent information or students' humorous asides. There are

also pages from students' reports on rocks. A tongue-in-cheek section at the end discusses the real and fantasy aspects of the book. Containing uncluttered text and illustrations, it is an anticipatory page-turner full of exciting adventure from school yard to volcano and back. Mary Lou Budd, Milford South Elementary School, OhioCopyright 1988 Reed Business Information, Inc. --This text refers to an out of print or unavailable edition of this title.

My daughter (now 7) has loved magic school bus for about two years now. Now she is really getting into it and everything is an experiment. There is nothing quite like this series.

My son loves these books. The series does a great job feeding a sense of curiosity and wonder in kids.

My son started reading this series at school, he was so interested i've kept buying the next book and he loves reading them. Great book series!

Longer story, I would say advanced first graders or second grade.

we love Magic School Bus, Ms. Frizzle and the class. We use MSB books, science kits, videos and lapbooks for our science curriculum and we are all learning SO much! Nothing like a little adventure to help us learn!

Excellent, everything as said.

My four-year old daughter loves this book. Well written with good illustrations make this a great bedtime story for children interested in science.

A bit shorter than expected, but that's fine. Kids tore into it right away.
