Beatty: Frontier Oasis

Synopsis

The great mining booms of Tonopah (1900), Goldfield (1902), and Rhyolite (1904) in the southern Nevada desert represent the last flowering of the Old West. Of all the towns spawned by the Rhyolite boom, Beatty is the only one that survived. Situated in the middle of a vast inhospitable desert, Beatty - a true oasis - had two assets the other boomtowns lacked: plenty of water and relatively easy accessibility on the route from Las Vegas to Tonopah. This book, illustrated with many fine historical photos, traces the area's history from prehistoric times to Beatty's present status as a tourism and mining center. This is the story of a group of colorful and enterprising people who built and sustained a community on the West's last frontier. This volume is based on published sources as well as recently collected oral histories of people who have an extensive and intimate knowledge of the history of Beatty, Nevada.

When I travel to Death Valley National Park, I stop at Beatty, NV. As you look over the area, it seems rather a lonely spot, and I ask myself why did they built a town here? Robert McCracken has done a lot of research in this part of Nevada along US 95 from Tonapah to Pahrump and the Amargosa Valley. Sometimes considered the last frontier in the lower 48 states. He answers the question of why, and how this community goes through glory and hardships through the 19th century and beyond. The photographs, the author illustrates the strength of survival, hardships and perseverance of the community. It is the only book I know that covers the human history of Beatty and Mr. McCracken has done a wonderful job. Easy pace reading but full of good historical information.
