EARTH2 (with CourseMate, 1 Term (6 Months) Printed Access Card) (New, Engaging Titles From 4LTR Press)

Synopsis

Every 4LTR Press solution comes complete with an engaging print textbook, tear-out review cards, an interactive digital solution(CourseMate), and an eBook all of which were directly influenced from student focus groups and surveys, and from interviews with faculty and students. Shorter, comprehensive chapters in a modern design present content in a more engaging and accessible format without minimizing coverage for your course. Tear-Out Review Cards at the back of the Student Editions provide students a portable study tool containing all of the pertinent information for class preparation. Instructor Prep Cards at the back of the Instructor's Edition make preparation simple with detachable cards for each chapter, offering a quick map of chapter content, a list of corresponding PowerPoint and video resources, additional examples, and suggested assignments and discussion questions to help you organize chapter content efficiently. Every 4LTR Press solution comes with CourseMate, the interactive digital component that offers a full suite of unique learning tools that appeal to different learning styles. Quizzes, audio downloads, videos, and more are only a click away. All of the content and resources you expect with a supplements package that is second to none.

Customer Reviews

Marc S. Hendrix is a Professor of Geology at The University of Montana in Missoula, Montana.

Growing up in Gettysburg, Pennsylvania, Marc developed an early love of geology in the 1970's

while working as a field assistant for his father, a biology professor at Gettysburg College. Marc received a bachelor's degree in geology from Wittenberg University in Springfield Ohio in 1985 and a master's degree in geology and geophysics from The University of Wisconsin-Madison in 1987. In 1992, he graduated with a Ph.D. in applied earth sciences from Stanford University, where he conducted research on the geologic record of mountain building and ancient climate in western China. Afterwards, he worked at Stanford as a post-doctoral researcher, analyzing the geologic history of Mongolia. Marc joined the faculty at The University of Montana in 1994 where he has developed a field-based research program focused on the geology of the northern Rocky Mountains. He continues to travel within the U.S. and overseas to conduct geologic research and currently lives in Missoula with his wife and two sons. Gray Thompson is Professor of Geology at The University of Montana where he teaches Introductory Geology, Mineralogy, Summer Field Mapping, and graduate courses in Clay Mineralogy and Shale Petrology. He has published over 20 research papers in international journals, mostly co-authored with his students. He is also a mountaineer and professional guide with first ascents, many with Jon Turk, of peaks and routes in the Rocky Mountains, Alaska, the Yukon, Baffin Island, the Alps, the Karakoram, and the Himalayas. He has authored many articles published in international climbing magazines and journals, and has been the subject of other articles in these publications. Many of the photographs in his texts were taken by Thompson and Turk on their climbing trips and expeditions over the last eighteen years.

I needed this book for my geology class, and it contains all the necessary information, but I feel like it could have been presented more study friendly, perhaps with more tables, listing individual details of the different elements explained in this book.

Table of contents page came falling out .

Right on time.Thanks, this book is for my son

I really enjoyed this book!!!

Arrived on time and as described.

Excellent price

Very nice

Great examples, up to date information
