Ulrich & Canale's Nursing Care Planning Guides: Prioritization, Delegation, And Critical Thinking, 7e (Nursing Care Planning Guides: For Adults In Acute, Extended And Homecare Settings)

Synopsis

Practical and comprehensive, this essential resource helps you plan individualized care for clients in a variety of settings, including acute care, extended care, and home care environments. It features 33 detailed nursing diagnosis care plans and 65 disease/disorder care plans that are keyed to specific expected outcomes and interventions. This book also includes the popular Online Care Planner that allows you to edit and print standardized nursing diagnosis care plans. Offers the most in-depth care plans of any planning book, fostering critical thinking and promoting effective clinical decision-making. 33 separate nursing diagnosis care plans provide detailed interventions with rationales and documentation guidelines for the most common nursing diagnoses. 65 comprehensive care plans serve as a complete reference for the most common disorders in acute care, extended care, and home care settings. Body system organization makes content easy to locate. Nursing/collaborative diagnoses are linked to actions and rationales. Specific points for discharge teaching serve as guidelines for planning client education. A complete discussion of caring for older adult clients and changes that occur with aging helps you understand the unique considerations of caring for this population group. A new care plan format focuses on prioritized nursing interventions, interventions that can be delegated, and documentation criteria, as well as differentiating between independent and collaborative nursing actions. Features 8 new nursing diagnosis care plans on topics such as comfort, confusion, contamination, decision-making, falls/injury, unstable glucose level, risk-prone health behavior, and self-care. Includes 9 new disease/disorder care plans for Abdominal Trauma, Alzheimer's Disease, Asthma, Enteral Nutrition, Intravenous Conscious Sedation, Internal Radiation Therapy (Brachytherapy), Mechanical Ventilation, Parkinson's Disease, and Total Parenteral Nutrition. Evidence-based practice content presents the latest research findings and standards of care. Updated NANDA nursing diagnoses, NIC interventions, and NOC outcomes reflect the latest nursing taxonomies. An open, user-friendly design makes it easy to quickly locate essential information. The companion Evolve website features 71 new narrated 3D pathophysiology animations that correspond to disorders content in the text.

Book Information

Series: Nursing Care Planning Guides: For Adults in Acute, Extended and Homecare Settings

Paperback: 976 pages

Publisher: Saunders; 7 edition (September 13, 2010)

Customer Reviews

"This reference offers a two-color, two-column layout, with nursing assessments and therapeutic interventions on the left, and rationales on the right. After opening guidelines on how to manage and delegate nursing care, the book presents nursing and surgery care plans, with chapters organized by body region and body system. Each care plan identifies relevant nursing diagnoses and collaborative diagnoses. For each diagnosis, there is information on etiology, desired outcomes, and a complete list of nursing actions, potential complications, and notes on client teaching. This seventh edition contains expanded information on acute care, community, extended care, and home care settings. It has been updated to include the most recent NANDA International nursing diagnoses, outcomes classifications, and nursing interventions classifications. The companion website offers a care planner with a set of 33 nursing diagnoses and interventions, plus 70 pathophysiology animations. Haugen teaches at Samuel Merritt University. Galura is a clinical nurse educator at Florida Hospital." - Book News, Inc.

Before buying a Care Plan book, I went to a local bookstore and reviewed about 15 books. This one was by far the best one for me. You can look up by the Nursing Diagnosis Care or a specific disease and find your Care Plan. Listed are Subjective and Objective results, Risk Factors, Desired Outcomes, Nursing Assessment and it's rationale and lastly, therapeutic nursing interventions and their rationale. This book was \$56 at B&N, but I was able to get one slightly used for just \$26. Well worth the investment. Coincidentally, it is the same book that is recommended by my Nursing Program.

s an excellent book and the services of are the best

I just received this and used it for 2 care plans - I have about 5 care plan books and this one is the best - it is set up by NANDA diagnosis as well as another section by illness - it has good patho reasons for the interventions - it's not only useful for writing a care plan but it would be useful to use at clinical rotation.

This book is the second care plan book I purchased during nursing school. This one is much better as it has many more nursing Dx with detailed interventions and rationales compared to the first one. Having the nursing Dx listed under each medical Dx has been useful instead of having generic interventions for each nursing Dx.

I like the way the rationales are given with the interventions

does not have ALL nanda nursing diagnoses, but has a fair amount. a plus is that they will list common diseases and procedures, and the care plan outline to follow. I feel this book could have had more in it but it is a great book to hav as a beginning nursing student. book was bought used and the price was amazing!

Don't get the kindle version. Very hard to read tables with interventions and assessments. Can't make font bigger. Wish I got the regular book

I got this on the recommendation of a classmate and it has a better layout of the NANDAs required for school. Worth the money.
