Enzootic Bovine Leukosis And Bovine Leukemia Virus (Developments In Veterinary Virology)

Synopsis

This volume on enzootic bovine leukosis (EBL) and bovine leukemia virus (BLV) is the second in our series "Developments in Veterinary Virology". Each book in this series is devoted to a major virus disease of agricultural significance. The chapters in each volume are planned to supply information on a range of subjects from pathogenesis of the causative virus to vaccination, eradication, and rules regarding disease control. The present volume on enzootic bovine leukosis and bovine leukemia virus updates the reader on the disease and its causative agent and includes the nucleotide sequence of the BLV genome as well as data on its integration into the DNA of the tumor cell. Insights into diagnosis, veterinary legislation, and the economic aspects of EBL are also provided. Intense research conducted on EBL and BLV during the course of a decade is presented in a most concise and in-depth manner, so as to provide the reader with a comprehensive overview of this economically important disease of cattle. I wish to thank the editors, A. Burny and M. Mammerickx, as well as all the authors, for making this excellent book available at a stage when the knowledge on bovine leukemia virus will also contribute to our understanding of the virus causing human AIDS.

Book Information

Series: Developments in Veterinary Virology (Book 2)

Hardcover: 284 pages

Publisher: Springer; 1986 edition (December 31, 1986)

Language: English

ISBN-10: 0898388465

ISBN-13: 978-0898388466

Product Dimensions: 6.1 x 0.8 x 9.2 inches

Shipping Weight: 1.4 pounds (View shipping rates and policies)

Average Customer Review: Be the first to review this item

Best Sellers Rank: #11,778,306 in Books (See Top 100 in Books) #32 in Books > Medical Books > Veterinary Medicine > Virology #113 in Books > Medical Books > Veterinary Medicine > Microbiology #2800 in Books > Textbooks > Medicine & Health Sciences > Veterinary Medicine > General

Customer Reviews

The book will be of interest to virologists, veterinary students, those involved in regulatory procedures and control of bovine leukosis and specialists in retroviruses in other species including

AIDS in man.' The Veterinary Record, August 1990
