Sharing Nature With Children, 20th Anniversary Edition

Synopsis

As Joseph Cornell's classic book reached its 20th anniversary, Cornell drew upon a wealth of experience in nature education to significantly revise and expand his book. New nature games' favorites from the field' and Cornell's typically insightful commentary makes the second edition of this special classic even more valuable to nature lovers world-wide. The Sharing Nature movement that Cornell pioneered has now expanded to countries all over the globe. Recommended by Boy Scouts of America, American Camping Association, National Audubon Society and many others.

Customer Reviews

. . . deserves wider attention than it has yet received. . . an effective tool for creating a greater awareness and enthusiasm for the beauty of nature. --Today's Librarian, July 1999

This book is a classic, with lots of games and activities that can be used to introduce nature to kids. We are in the process of establishing an interpretive center in the Orinoco River basin of Colombia, with tropical education for kids one of our primary goals, so Sharing Nature with Children is definitely going to be one of our important resources. This book is a must have for anyone interested in the subject of interpretation, tropical or environmental education.

This book is helpful for parents and primary grade teachers who want to help their children connect

with nature. It is full of ideas for outdoor activities and extensions. It is a good companion book for Last Child in the Woods by Richard Louv.

Absolutely fantastic book - first got it 20 years ago, lent my copy out when I was an outdoor educator... no idea where it went. Now I have it back and I'm delighted. Sifting through the magical pages reminds me of all the high-impact activities I did with my campers and students... so glad to have it in hand once again.

This is an extremely useful book for parents, teachers, outings leaders (my reason for ordering it). I was able to use some of these ideas in my first national Sierra Club Family Outing this summer. Something in here for any size group, in any kind of natural area. There's a reason this is a classic!

Classic nature sharing book loaded with good ideas, exercises and fun stuff that will teach children about our natural world. It's one of the books used in literature review by the National Association of Interpretation's Certified Interpretive Guide program.

Great ideas for introducing kids to nature! I have adapted them for blind children.

This is a great book to give parents ideas for how to engage children in nature. Fun activities for adults as well. Helps everyone to focus and be in the moment.

Nice to have an updated version of this book
