My 2 year old LOVES this entire series of Nat. Geo Readers... I have purchased about 25 different titles, "pre-readers" as well as Level 1 & 2 readers. She loves them all & will ask for certain ones.

The "pre-readers" level books are extremely simple & great because she memorizes the words & can "read" it herself. We love the more advanced ones too, because there is more information to talk about. I have learned quite a few facts, myself!) What a great series. The price is reasonable & pictures are great. These are really getting her interested in nature, animals & science... I will continue to buy these as they are released, for our collection!

Another awesome reader for kiddos. This is a must have for any classroom library.

My 20 month old son loves fish, but this book doesn't hold his attention as much as I was hoping. We'll try again in a few months.

For the little one who loves fish, I recommend it highly

Very BASIC book

Great books for kids

I purchased this book as a surprise for my 3 year old nephew who is obsessed with fish! He loves it! The pictures are great --- colors are so vibrant! I highly recommend this book!

We love these books! They aren't as annoying and boring as some kids books. We like learning the real facts!
