The Diabetes Carbohydrate And Fat Gram Guide : Quick, Easy Meal Planning Using Carbohydrate And Fat Gram Counts

Synopsis

For people with diabetes, counting carbohydrates and fats is the approach recommended by dietitians. This user-friendly guide describes how to use many generic and brand-name foods in meal planning and teaches you to convert carbohydrate grams into carbohydrate exchanges. Nutrient counts for food planning, how to understand grocery store food labels, and how to incorporate different sources of food-count information into meal planning are also covered.

Customer Reviews

Lea Ann Holzmeister, R.D., C.D.E., is a nutrition consultant and a certified diabetes educator, and is widely published in diabetes education.

Great condition

The fast food section will amaze you, an Arby's Big Montana , Italian or Turkey sub sandwich contains an entire days worth of Sodium. Not to pick on Arby's, many of the fast food joints have a sandwich/meal that is over 2000 mg of sodium. Even if you find a sandwich/burger with only 1200 mg, the Fries will finish you off. A Hardee's Big Country Breakfast w/sausage 2310 mg of sodium, so you are done with your days sodium right after breakfast! I also enjoyed reading the ethnic foods sections, especially Alaska, Moose, Caribou, Venison, and Bonehead Whale, all very low in fat,

calories, and sodium.

I was recommended this book by a dietitian...it basically helps you make informed choices when planning what to cook, when you're out shopping at the grocery store, and especially when you're eating out. It is amazing how many calories some of our meals contain and if we only took the time to really scrutinise the food we consume, I think it can make a lot of difference to our health. I keep this as a guide when I prepare meals at home, and it has also taught me how to read labels on packaged foods etc...won't it be great if all restaurants did the same when we eat out?

I have been 100% pleased with the book so far. Everything I have wanted to find has been there and after a little use I am becoming a bit more familiar with the somewhat odd categorization and organization of individual food items. If I had to find something to criticize about the book it would be that a book of this size (over 600 pages) that one expects to use frequently would really be much more pleasant to use if it was spiral bound for easier access.

If you are diabetic this is a must have book to help change your eating habits. I would recommend to anyone..Carb counting is very important and this book will definitely get you a head of controlling your blood sugars. Also there are some great diabetic receipts to cook..I love this book and couldn't do without it..

Nice carb reference.

If you have diabetes, you must have this book. This book answers questions why your diabetes is out of control. You will know why what you eat affects your blood sugar.

Good information about most conventional food.I find it a bit difficult to find some items because they don't quite fit into the pigeonhole categories.Great information for fast food items!
