FOR DESIGNERS

BLOOMSBURY

Synopsis

Building information modeling (BIM) is the new AutoCADÃ Â® for architects and interior designers-and RevitÃ Â® Architecture is the leading software package in the BIM marketplace. RevitÃ Â® Architecture 2018 for Designers is written specifically for architects and interior designers as they transition from CAD to BIM. Beginning with the building blocks of BIM modeling (walls, windows, and doors), the text progresses through dynamically generated 2-dimensional and 3-dimensional views to advanced features-such as photorealistic rendering, custom title blocks, and exporting drawings to AutoCADÃ Â® and SketchUp. This new edition is updated to include coverage on the latest changes in RevitÃ Â® Architecture 2018. Instructions are fully illustrated, creating a smooth transition to the BIM environment for all designers. Clear, concise, and above all visual, this is the essential RevitÃ Â® guide written specifically for interior designers and architects.

Customer Reviews

I genuinely love this text book, and so do my students. It is short, sweet, and to the point. Other Revit textbooks are too large, too wordy, and not as clear. The Seidler text is unique because it is straightforward, and the blue summary pages with checklists at the end of each chapter are very helpful. I think this is the best beginner Revit textbook on the market. -- Julia Day, Kansas State University
