"[A] valuable addition to the library's reference section or a science classroom." [Library Media Connection](#)

I bought this for my 5-year old niece as she has interest in how the body works. An adult needs to read it with her and explain certain things. As she gets older she can read this herself. There are

lots of great pictures and illustrations. It's a really nice book.

Awesome book - daughter loves it - beautiful photographs!

Very educational, colorful, informational. Would buy again.

My five year old son's love for all things nature is miles ahead of his reading ability! This will keep him occupied till school re opens in August. The pictures/ illustrations are wonderful however could do with some animation to fascinate the little ones. Great work guys keep it Comin!
