## Customer Reviews

Roger Tory Peterson, one of the world's greatest naturalists, received every major award for ornithology, natural science, and conservation as well as numerous honorary degrees, medals, and citations, including the Presidential Medal of Freedom. The Peterson Identification System has been called the greatest invention since binoculars. These editions include updated material by Michael O'Brien, Paul Lehman, Bill Thompson III, Michael DiGiorgio, Larry Rosche, and Jeffrey A. Gordon.

I bought this for my wife and she love mostly likes it. Some of the illustrations could be a bit better, but overall a pretty comprehensive guide.

I was expecting a field guide on mammals - I have several other peterson guides; but I ended up with so much more! It includes a section for identifying found animal skulls, tracks and pretty much

anything a nature walker would like to know about North American mammals. I'm very happy with the purchase.

Exactly as I hoped for!

excellent little reference for people interested in nature.

A must for every nature library. Hardbound would have been nice, but this is still a great value for the price.

My homeschooled 8 year old son really enjoys these books. They are full of handy information and pictures. Definitely a great find for kids curious about mammals.

just what I wanted.

Very good book for identifying the mammals of North America. Great for the Biologist or Animal enthusiast. Very helpful book.
