Customer Reviews

"It is a book that might be useful to anaesthetic consultants with an interest in obstetric anaesthesia, perhaps when faced with one of those rare and complex clinical problems that sometimes crop up unexpectedly. Certainly, higher trainees with an interest in the sub-speciality would find immense value in its detailed and thorough coverage. It would also function well as an oracle of knowledge for people of any background searching for answers in this field". Reviewed by British Journal of Anaesthesia, May 2015 "It has been five years since the last edition of Obstetric Anesthesia Principles and Practice was released. In the interim, there has been significant change in obstetric anesthesia practice, with an emphasis on ultrasound for regional anesthesia, noninvasive technologies for hemodynamic monitoring, and new labour analgesia modalities for delivery. These innovations are successfully incorporated into the fifth edition of the textbook which consists of 55 chapters descriptively organized into ten parts." "Chestnut's Obstetric Anesthesia: Principles and Practice" is truly the definitive textbook of Obstetrical Anesthesiology. It is exceedingly well-written, well-illustrated, and well-organized. Dr. David H. Chestnut, Dr. Cynthia A. Wong, Dr. Lawrence C. Tsen, Dr. Warwick D. Ngan Kee, Dr. Yaakov Beilin, Dr. Jill M. Mhyre, and Dr. Naveen Nathan have collaborated to write an absolutely masterful and authoritative textbook on the care and management of pregnant women and their infants. "Chestnut's Obstetric Anesthesia: Principles and Practice" is one of the best medical textbooks ever written, and it certainly deserves to occupy a prominent position in the personal library of every practicing anesthesiologist, obstetrician, and neonatologist. I enthusiastically give it my very highest recommendation!

very well done really like the kindle version

Very thorough but very expensive!

This book is good so far. I am only like 3 chapters into it but the material is not too difficult to read.

The bible in OB anesthesia. This is the go to text for any consult or challenging case.
