Mies Van Der Rohe (Basic Art Series 2.0)

Synopsis

Less is more: Finding perfection in purity Famed for his motto "less is more," Ludwig Mies van der Rohe (1886–1969) was one of the founding fathers of modern architecture and a hotly-debated tastemaker of twentieth century aesthetics and urban experience. Mies van der Rohe's philosophy was one of underlying truth in pure forms and proportions. With the help of contemporary technological and material developments, he sought a stripped-down purity to architecture, showcased by the likes of the Seagram Building and Farnsworth House. Some spoke out against this stark approach as the precursor to bland, generic cityscapes. Others cite Mies van der Rohe as the ultimate master of an abidingly elegant essence. This book presents more than 20 of Mies van der Rohe's projects from the period 1906–1967 to introduce his groundbreaking practice and influence in both America and Europe.
