Customer Reviews

Extremely disappointing. This "book" consists of 55 pages of enormous typeface so there is really about 10 pages of content. That content is of the most basic and superficial. The only new information I learned was that I can allegedly use the Dot to access my Gmail account. But that is all the book told me. Nothing about how to set that up or manage it. I would call this book virtually worthless.

should be ashamed for even selling this "book" that's not worth the paper it's printed on. It's more of a pamphlet... filled with grammatical errors. I skimmed through it in about 4 minutes... and learned absolutely nothing I didn't know beforehand.

What a huge waste of money. 50 pages of a really big font and very little new information that you can't get anywhere. Definitely not what I was expecting.

Very little help in this 59 page book. It is not very expensive, so its not a total waste.

Got as gift. Waste of money so don't buy. It is so amateur. Print very large so he stretched about 10 pigs into 55. Better info online or call 's fast &a helpful customer service.

Not so hot. Too beginner for me. Babyish. Doesn't get into what I wanna know. Didn't really need. Thought it would be better. Bummer.

I'm trying to understand all the book has in it.

Product was as expected.
