WoodPatternExpert; 20 Years of Experience! My instructions with easy to follow patterns and directions are designed as a construction project for the beginning woodworker. Extensive attention is given to speed and ease of construction, with a minimum of tools. A great Cedar Chest can be built with just a skill saw, table saw, clamps, and drill. Directions are aimed at the beginning woodworker, but should not bore even an experienced carpenter.

WARNING: Everyone Will Love This Cedar Chest Design. Just about everyone who sees it will want you to build one or more, for them. (That's the reason I decided to write these plans.) Unlike most plans out there, you will be able to understand these! I have looked at others and I guarantee they are not as good as my plans! The plan features:

- Very detailed, step by step instructions.
- Each step includes diagrams and or photographs to assist in the construction process.
- 14 Patterns; One for each piece that makes construction so easy a "caveman could do it"!
- Built entirely from Cedar 2X4's and Thick Cedar Plywood or any other wood you prefer.
- Tips, Tricks and Notes that allow you to cut without error the first time.
- Can be built with just a skill saw, table saw, clamps and drill.

This project plan is designed for the beginning woodworker, but should not bore even the most experienced carpenter.

I have not get pack i want to know when is going to be here

Book had multiple errors and inaccuracies. Accounting for this, the chest still is beautiful after finished. I ended up using white oak as cedar was not available in my area.
