Boiling Point: Government Neglect, Corporate Abuse, And Canada's Water Crisis

Synopsis

Passionate and cogent, this could be the most important book of the year for Canadians. We are complacent. We bask in the idea that Canada holds 20% of the world's fresh water; water crises face other countries, but not ours. We could not be more wrong. In *Boiling Point*, bestselling author and activist Maude Barlow lays bare the issues facing Canada's water reserves, including long-outdated water laws, unmapped and unprotected groundwater reserves, agricultural pollution, industrial-waste dumping, boil-water advisories, and the effects of deforestation and climate change. This will be the defining issue of the coming decade, and most of us have no idea that it is on our very own doorstep. Barlow is one of the world's foremost water activists and she has been on the front lines of the world's water crises for the past 20 years. She has seen first-hand the scale of the water problems facing much of the world, but also many of the solutions that are being applied. In *Boiling Point*, she brings this wealth of experience and expertise home to craft a compelling blueprint for Canada's water security.

Book Information

Paperback: 312 pages

Publisher: ECW Press (September 13, 2016)

Language: English

ISBN-10: 1770413553

ISBN-13: 978-1770413559

Product Dimensions: 5.5 x 0.9 x 8.4 inches

Shipping Weight: 14.1 ounces (View shipping rates and policies)

Average Customer Review: 4.0 out of 5 stars 2 customer reviews

Best Sellers Rank: #750,529 in Books (See Top 100 in Books) #160 in [Books > Politics & Social Sciences > Politics & Government > International & World Politics > Canadian](#) #862 in [Books > Politics & Social Sciences > Politics & Government > Public Affairs & Policy > Environmental Policy](#) #1059 in [Books > Science & Math > Nature & Ecology > Natural Resources](#)

Customer Reviews

"Barlow's documentation of the very real threat to the global water supply is important reading as Canada faces key end-of-year deadlines regarding new pipeline development and meeting the targets of the Paris climate agreement." — *Quill & Quire*

"Boiling Point is a rallying cry — a critical call to action." — *Herizons*

Magazine – “An insane road trip to the Canadian water apocalypse courtesy of the corporate forces of ignorance and greed, and a blueprint for a rational, prosperous and dignified future by the visionary prophet of democracy and sustainability.” – Robert F. Kennedy Jr.

– “Maude Barlow is one of our planet’s greatest water defenders. In this indispensable book, she brings her hard-won wisdom home, demonstrating that Canada is already in the midst of our own water crisis. With great warmth and precision, she also shows that by taking up the call for water justice – so intimately connected to other struggles – we can start to build the society we want. This book has all the facts, forceful analysis, and moral clarity that Canadians will need to wake up and join this most urgent of struggles.” – Naomi Klein, author of *This Changes Everything* and *The Shock Doctrine*

– “Barlow concludes on a hopeful note, providing reasonable solutions that show how a blue and just Canada is possible. She understands, however, that while most large corporations will do almost anything to increase profits, the primary responsibility for protecting citizens lies with governments at all levels. Barlow makes a convincing case that both our provincial and federal governments are failing this fundamental duty.” – Vancouver Sun

– “Barlow’s documentation of the very real threat to the global water supply is important reading as Canada faces key end-of-year deadlines regarding new pipeline development and meeting the targets of the Paris climate agreement.” – Quill & Quire

– “Barlow gives us more than a wakeup call. She gives us a call for action now!” – Canadian Association of Labour Media

– “Boiling Point is a concise, informative guide to Canada’s water crisis . . . Here’s hoping many Canadians read Boiling Point and demand the necessary action.” – The Uniter

Passionate and cogent, this could be the most important book of the year for Canadians. We are complacent. We bask in the idea that Canada holds 20% of the world’s fresh water; water crises face other countries, but not ours. We could not be more wrong. Barlow is one of the world’s foremost water activists and she has been on the front lines of the world’s water crises for the past

20 years. She has seen first-hand the scale of the water problems facing much of the world, but also many of the solutions that are being applied. In Boiling Point, she brings this wealth of experience and expertise home to craft a compelling blueprint for Canada's water security.

Book brought about valid points on the threats to Canada's water supplies and I found that I was captivated enough to want to keep reading on. It would've been great to have more details around the companies such as Nestle and how the gov't is doing so little to regulate them from pumping watersheds dry only to resell the public at ridiculously inflated prices.

Barlow does a thorough job in analyzing and explaining Canada's water needs and the challenges of keeping and safeguarding it for future generations.
