Spanish Trinidad

Synopsis

Spanish Trinidad is the first ever history of the 300 year span of the Spanish period of Trinidad, written from a strictly Spanish perspective. From the encounter of Christopher Columbus with the first Trinidadian Amerindians during the summer of 1498, to the handover of the island to the British in 1797, Francisco Morales PadrÃ n describes the complex process of the Spanish settlement of the island while searching for El Dorado, the progressive social and economic development of â œLa Trinidad de Barloventoâ • (as Trinidad was known until the late 18th century), the significance and relevance of the Caribbean Windward Islands in the Spanish geo-political strategy of its American provinces, and the key role played by Trinidad in the outcome of the European disputes in the West Atlantic after the French Revolution. Comprehensive and expansive, Spanish Trinidad is rich study of the three centuries of Spanish presence in Trinidad and an invaluable contribution to the recorded history of the Republic of Trinidad and Tobago and the Caribbean.

Customer Reviews

A well researched and written History of the island, with factual information from it's discovery by Columbus in 1498, to the spastic and anaemic early attempts at colonization,...it's virtual

abandonment to a backwater existence for close to three hundred years,...with almost nothing being accomplished through thirty eight successive administrators,both Civil and Military,until the appointment of the thirty-ninth and last Spanish Governor,..Don Jose Maria Chacon,..who's Herculean efforts,with the implementation of the "Cedula of Population"...the turmoil taking place in the French islands,...saved many lives,established a new Capital,Port of Spain,new town in the southern end,San Fernando,diverted the East river,imported Turkey vultures as an aid to the major sanitation problem....built an Observatory,(Still standing and utilized as a Police communication centre),from which the first Meridian in the Western Hemisphere was established,by Don Damien Churucua y Alorzo,(Rear Admiral,mathematician and Astronomer),..thus allowing mariners to more accurately fix their location.
