Blind Faith: Reverse Macular Degeneration Thru Diet & Nutrition

Synopsis

Fourth Printed Edition: Updated June, 2016. The continuing story of how one man reversed wet macular degeneration in eleven weeks. This update includes follow-up results of a Fluorescein Angiography scan (with dye) that showed no bleeding in either eye. The author's Ophthalmologist said that the wet macular degeneration was completely reversed and that both eyes were very healthy. This has been accomplished without any medical drugs. "John Crittenden is one of those rare clients who goes way above and beyond the support and encouragement he receives and clearly doesn't take no for an answer. His intuitive nature and persistence, along with a passion to learn and the ability to listen, have allowed him to defy all odds outlined by conventional medicine. BLIND FAITH is a true story of encouragement, empowerment and hope. I encourage everyone with a chronic disease, or anyone that cares for someone suffering from a chronic disease, to understand that John's case outlines something greater than macular degeneration; this approach can be applied to any chronic disease state." Dr. Brian Davies, BSc, ND Comparison with current Anti-VEGF Injections published results: Avastin - 9.7 letters gained (in 52 weeks) Lucentis - 11.2 letters gained (in 52 weeks) Eylea - 13.3 letters gained (in 52 weeks) Crittenden Protocol - 35 letters gained (in 11 weeks) Crittenden Protocol - 50 letters gained (on August 28, 2015) If the author can do this then perhaps you can too. He is not writing about something he read or was taught in medical school. He is passionately writing about what he actually did and explains the full details of the protocol he developed and used. Like many of you he was told by his Ophthalmologist that there was no cure. This has been proven to be wrong. Now his Ophthalmologist (who is a professor and current head of the Retina Division at the University of British Columbia), says he has never seen this kind of regeneration before and told him to "keep doing what you're doing, you may change a lot of our minds." What You Will Learn From This Book 1. How the author reversed macular degeneration with his own naturopathic protocol in eleven weeks with continual monitoring by his Ophthalmologist. 2. How the author connected the dots between several fields of science to develop his food-based protocol. 3. Full details of his protocol and how it may be personalized for others by a Naturopathic Doctor. 4. More than 200 printed pages and more than 90 links to the science for those who want to do their own research. 5. How our bodies are creating new cells all the time, why this does not cure disease for many people, and what we can do to change that. Much, much more... BLIND FAITH is the true story of how one man discovered the answer to reversing wet macular degeneration thru diet and nutrition alone. The results are proven and cannot be challenged.

Customer Reviews

What a waste of \$10.00 and my time. I was so excited to get this book because both my husband and I have macular degeneration. I was hoping for something new and useful that would help us. I was so disappointed because of all the testing he recommends and just finding a doctor in my small town would be impossible. The repetition was unreal. The only thing I agree with him on is the fact that macular degeneration is a money maker. The injections are so expensive and the average person could not afford them so the taxpayers do pay for them. I was so hoping for guidance for vitamins and minerals - something we could actually do. One star is the most I can do.

This is the best book I have read on macular degeneration so far and I have a bunch of them. Now at least I have hope and some tools in my arsenal ! this is the path that he took to restore his sight when they told him there was nothing they could do -just like they have told me. I would highly recommend this book to anybody who is doing the fight to keep their eyesight and their independence

All of this sounds great, but the average person would have to do a lot of work/research in order to even begin such a protocolMany tests to be conducted by a Doctor but first you would need to locate one that is willing to help and cooperate with you. Also what about the expense of all these tests?

I'd like it in hard copy. Too much info, and for me hard to pull it all together on Kindle. But it is good info and I think very worthwhile, the body does know how to heal itself, given a chance.

This is the information i have been searching for how to prevent and reverse macular degeneration naturally. I just started reading. I highly recommend!

Very interesting read...Nice to know that Ophthalmologists are not always right.I was told "You have AMD, there is nothing you can do about it. Go home and live your life"

I'm not sure his "protocol" is all that sound nutritionally. Anyone with acid reflux or any other eating limits could not use this at all. I found a few interesting facts and information, but he tends to contradict his own recommendations at times.

The information I was looking for is here but could have all been said in half the number of pages. Much repetition. It's hard to hang with that style writing.
