Perspective Drawing For Interior Space

Synopsis

Using step-by-step instructions together with line-colored drawings, Perspective Drawing for Interior Space offers procedural instruction that covers freehand and technical one-, two-, and three-point perspectives. This text begins with the basic fundamentals of perspective by utilizing geometric shapes (cubes, cones, pyramids) and then advances beyond the core skills, to creating furniture, and finally, complete interior spaces. Students will learn to use grids to help them draw scale and proportion in perspective. The text also teaches students to use floor plans and elevations to create these drawings.
