Negotiating With Backbone: Eight Sales Strategies To Defend Your Price And Value

Synopsis

B2B sales professionals: resist mindless discounting, level the playing field against tough procurement organizations, and close the deal on your terms! Negotiating with Backbone, Second Edition definitive guide for every sales pro facing the “procurement buzzsaw” and it’s just been updated with even more powerful strategies and techniques! Where traditional purchasing managers negotiated, procurement officials seek to dictate, through multiple tactics with a single intent: to gain unprecedented discounts and concessions. Premier pricing strategist and sales consultant Reed K. Holden gives you the powerful new strategies and tactics you need to protect your margins and get the right deal. Holden guides you through recognizing what purchasing negotiators are really up to, keep value at the forefront of negotiations, and avoiding the mindless discounting that wrecks profitability. Holden details eight strategies for all types of pricing negotiations, including approaches for negotiating with price buyers, relationship buyers, value buyers, and poker players, reverse auctions, and much more. In this Second Edition, he offers extensive new coverage of establishing your foundation of value, and developing crucial give-get options, including value-added services. This book will be an invaluable resource for every B2B sales professional, customer-facing professional, and every executive responsible for leading successful sales organizations.

Customer Reviews

With 2015 just begun, it is an appropriate time to improve your skills, and *Negotiating with Backbone* is an excellent way to polish your business-to-business selling skills. If you are a seasoned sales person, you will be refreshing skills you already possess, and you will, undoubtedly learn important new techniques. Holden's book differs from the plethora of books about selling in his interesting categorization of buyers and the roles sellers play. Many books on selling assume that one model will work for all customers. Only part of this is true. This may account for the lack of success experienced by so many sales people. The "procurement pricing buzz saw" is the "new normal." Companies have been forced to reduce costs and, as I explained in a previous column, the procurement department is an obvious and often untapped source of easier profit. Expecting another 10% from new product-development is a long and expensive process, and wringing even more production efficiency is fast becoming extremely difficult. Holden identifies four types of buyers. Sellers are divided into those who have an existing relationship with the buyer, and those who have no relationship as yet. The first of the buyers is the "Price Buyer." The best of these are very clear about the specifications they require, the use the product or service will be put to, and the capabilities they demand from the seller. The best will be fair and open. Prior relationships carry little weight, and the existing seller will be replaced by any provider offering a better price for the very accurately specified goods or services. In this situation, where the existing relationship with the company is irrelevant, all sellers are described as the "Penny Pincher / Scout." All sellers have to constantly reduce costs, and scout the environment for new ways to save. The second type of buyer is the "Relationship Buyer." This buyer wants the seller to be part of the organization, and his expertise and insight is sought and respected. He is privy to sensitive matters and is trusted to have the company's best interests at heart at all times. The relationship is deep and secure. Sellers with an existing relationship are "In the Pack." Sellers

who have no relationship can only assume the role of the **Patient Outsider**, who must patiently wait for someone to slip or be unavailable. The **Patient Outsider** must make his presence felt, with no immediate return. The third type of buyer is the **Value Buyer**. These buyers understand what economic value a superior product or service can yield for the company. They are happy to pay more for a product or service provided they are convinced of its economic value. They require sellers to know the business intimately so that they can add value, and be constantly working to improve their offering. Sellers with an existing relationship are called **Players** and have a seat at the table that they retain as long as they add sufficient value. The **Players** are unlikely to make mistakes; they work hard to retain their position and are invariably superb at their work. Sellers with no existing relationship have to be **Crafty Outsiders** to get a chance to engage with this desirable buyer, who happily pays more for more value. The **Crafty Outsider** needs to be looking intently for advantages and opportunities to come to the attention of the **Value Buyer** and get at least some piece of the order. The fourth type of buyer is the **Poker Player**. This buyer is a **Value Buyer** who plays the role of a **Price Buyer** to extract as much as possible from the seller. The **Poker Player** is happy to bluff, and to use tactics and manoeuvres (fair and foul) to achieve the company's goals. Sellers with an existing relationship are the **Advantaged Players**, but will be subject to all manner of artifices to extract value at the lowest price. If a seller has no prior relationship, they play the role of the **Rabbit**, racing around the track to keep the hounds running at top speed. Rabbits have no chance of winning the work; they are only there to keep the **Advantaged Players** running. The book provides guidance for each seller, before and during the negotiation. One of many important pieces of advice is **qualify, qualify, qualify**. In the case of the **Poker Player**, being the Rabbit is a horrible waste of time and energy for a zero chance of getting the business. Given the instruction to get three quotations, Procurement will encourage the **Rabbit**. Failing to pre-qualify by asking probing questions will have you running purposelessly. Your valuable time can be better spent. The basic piece of advice to all in sales is an obvious, but nevertheless very difficult fact to absorb. **Never take it personally**. See it as the zero-sum game it is, with the golden rule

ÃƒÂ¢Ã ¬Ã œ he who has the gold makes the rules. Know too, that in the game of business, Procurement is ÃƒÂ¢Ã ¬Ã Å“sweating the deal just as much as you are, but they just learned not to show it.ÃƒÂ¢Ã ¬Ã With this attitude to selling, and armed with insights and tactics of which the book is full, you will be able to ÃƒÂ¢Ã ¬Ã Å“negotiate with backbone.ÃƒÂ¢Ã ¬Ã Å•Readability Light -+--- SeriousInsights High -+--- LowPractical High -+--- Low* Ian Mann of Gateways consults internationally on leadership and strategy and is the author of *Strategy that Works*.

I have attended a one-day workshop with Mr. Holden, while reading this book. I found both are complimentary to each other, hence it would be unwise to ask someone to read only this book and develop negotiation skill. Having said that, this is perhaps one of the most easy-reading book on an important professional topic I have seen so far. The book is concise, less than 200 pages, and I could finish it in one sitting. The book contains 10 chapters overall, starting with setting the context and ending with the reality of negotiation. In between, the book describes the four different types of customer behaviors - price buyer, relationship buyer, value buyer, and poker player. The book also covers the essential topics like give-gets, bluffs, and signs of a losing game. What the reader needs to keep in mind is that the book only covers the negotiation with the procurement personnel, the people who keep their job by reducing price only. Quite often, we tend to mix our give-gets for the technical buyer (or true beneficiary) with the give-gets for a procurement personnel. It's important to be clear in mind about the context of this book. The book generally assumes that managing the business buyers (or technical buyers) satisfied would be a key to winning the final negotiation. That may not be the case always. In reality, there are instances where the final buying decisions get hijacked by procurement personnel leaving the technical buyer little influence. There are also instances, where the technical buyers (or end beneficiaries) collaborate with the procurement personnel extensively and pull up an excellent poker play. Finally, big family businesses usually keep the big decisions to themselves, no matter how strong or large the procurement personnel may be. All these scenarios can be properly brought up, deliberated, and practiced when within the workshop of Mr. Holden. That's the time to realize the significance of the content of this book. Overall, nice book for quick and easy reading. It's also a nice book to practice some of the art and science of negotiation.

This book is incredibly valuable to any salesperson, selling anything. It's especially applicable to those of us working our way through the modern procurement departments of large organizations.

The material is relevant and the tips can be implemented immediately. Reed is able to speak to the reader - there are bits of humor and quite a bit of "that's me!" I found the flow of the book to be engaging - and it's now a permanent piece of my "go to material." Very well done. I can't wait for the second edition.

Some people complain that this book is oversimplified view on the negotiation. I argue that it's intentionally very practical and written far from being an academical attempt to catalog all theoretical nuances of negotiations. The book talks to the practitioners, is full of real-life examples (described in a very succinct way) and is not watered with fluffy meaningless observations (which are so common for the business books as a means to make them tick). I personally appreciated the fact that it's only 200 pages and the book's efficiency was very high for me. I read many years ago another book of the author (pricing with confidence) and found this book a preferred option to learn about the author's experience and philosophy of pricing and negotiations.
