Who Is Jane Goodall? (Who Was?)

Synopsis

A life in the wild! Jane Goodall, born in London, England, always loved animals and wanted to study them in their natural habitats. So at age twenty-six, off she went to Africa! Goodall's up-close observations of chimpanzees changed what we know about them and paved the way for many female scientists who came after her. Now her story comes to life in this biography with black-and-white illustrations throughout.

Book Information

Lexile Measure: 700L (What's this?)

Series: Who Was?

Paperback: 112 pages

Publisher: Grosset & Dunlap (November 8, 2012)

Age Range: 8 - 12 years

Grade Level: 3 - 7

Customer Reviews

Roberta Edwards lives in New York, New York. John O'Brien lives in Delran, New Jersey.

Outstanding, easy to read yet in-depth enough, biography for jr. high age readers. Our 6th grade daughter is currently reading for a "biography" book-report assignment and is loving it! Well worth the low price on Kindle!

I read this to my 5.5 year old granddaughter chapter by chapter at bedtime. She found it very informative and loved it. Later when someone was talking to her about tv naturalist Steve Irwin she

said he looked like Jane Goodall and described Goodall's work to that person. I have liked all the books in this series. Informs kids much more than they will be informed by one time classroom lessons.

I used this book for students to study a person in history to write a report on. This was for a 4th grade classroom. Each student read the novel on their own and filled out a novel study that I created for non-fiction books. Students were able to follow the book with ease and understand what they were reading. There were several pictures to aid in understanding. There is also a timeline that helps students understand the timeline of events as they read. Very great resource.

Who is Jane Goodall is the most amazing book a child could read when I read this book I was very shocked at how passion ate all of the new born chimpanzees I was also heart broken at how passion did not care for her child how can some one be so careless and let their child just die like that she didn't even feed the child horrible but I would give this five stars I'm just going to say good job Roberta Edwards and I thank you for writing this book for children.

excellent

This book was purchased, along with "Who Is Amelia Earheart?", as birthday gifts for my grand-daughter. I wanted her to learn early that women who have dreams and talent, and are willing to work hard, can do amazing things. It's easy to find biographies about famous men ~ not so easy to find many about women, so I was happy to find some that are age appropriate and interesting. Since she loves animals, especially jungle animals, I know she's going to love this!

I gave this to my niece and she loved it. She really connected with it. These books are honest though, and there was a story of how she watched an ape steal an ape baby from another mom and eat it in front of her. hmmm I kind of think that's too much detail for a 1st grader.

The "Who is" and "Who was" series of books are very good for young children, informative and honest and inspiring. I loved reading these to my grandchildren, and loved hearing them reading the books when they got a little older.
