## **Customer Reviews**

Richard W. Varley, a runner since high school, is founder and president of the Manoa Road Runners and running coach and program coordinator for Team Jet Hawaii Running and Triathlon Club. He is director of internships and career development at the College of Business Administration, University of Hawai'i.

A great book to have for any runner living on Oahu and visitors alike.

This is a great guide written by someone that runs these areas regularly. I love that it provides such detailed information. I can hardly wait until I can try some of these routes myself.

Easy to understand and there are various running/walking courses on Oahu which never knew before. Great information and maps.

I just got my copy of this book last week, and I definitely like it. There are running options all over

the Island, and good directions for how to get there. The book also makes sure to include things like water fountain and restroom access for each run. If you are new to the Island and not sure where to go, this would be a great resource. My complaints are that the maps for each run are a little difficult to follow, and that there aren't more trail runs mentioned (although the author DOES go over the Tantalus trail system). Thanks!

This book is great for those who have never been to Oahu or have lived there for awhile. I thought I knew most of the good running routes on the island until I picked up this book. I usually let my friends borrow it when they visit as it gives them a chance to have a different (non-touristy) experience of the island. Great book!

Rick Varley knows O'ahu. He has been running and coaching runners on the island for over twenty years. The book also contains excellent, easy-to-read maps by Shingo Matushima, one of Hawaii's top graphic designers. If you are planning any runs on O'ahu, this book is a must.

But the Hawaii Kai loops are all ONE MILE OFF! While training for a long distance race, I thought I should confirm milage and to my surprise they were all off this was also doubled checked by Google Maps. The book is a good source for parking, restrooms, and water fountains. But that is a HUGE MISTAKE!
